

COMMONWEALTH OF MASSACHUSETTS
DEPARTMENT OF ENVIRONMENTAL PROTECTION

310 CMR 7.00 AIR POLLUTION CONTROL REGULATIONS

310 CMR 7.12 U INSPECTION CERTIFICATE, RECORD KEEPING AND REPORTING

7.12 U Inspection Certificate, Record Keeping and Reporting

(1) General Applications.

- (a) Any person owning, operating, or controlling a facility described in 310 CMR 7.12(3) through (7) shall register on a form obtained from the Department such information as the Department may specify including:
1. the nature and amounts of emissions from the facility,
 2. information which may be needed to determine the nature and amounts of emissions from the facility, and
 3. any other information pertaining to the facility which the Department requires.
- (b) Information required by 310 CMR 7.12(1)(a) shall be submitted annually for any facility having actual emissions greater than or equal to:
- | | |
|---|----------------------|
| Volatile organic compounds | 25 tons per year; or |
| Oxides of nitrogen | 25 tons per year; or |
| Any other pollutant regulated under the Act | 100 tons per year; |
- and once every three years for all other facilities. If a facility has actual emissions of either VOC or NO_x of 25 tons per year or greater, then information for both VOC and NO_x must be submitted.
- (c) The Department may require a facility to provide registration information and may inspect a facility at any time in addition to the times specified in 310 CMR 7.12(1)(b).
- (d) Upon verification of the information required by 310 CMR 7.12(1)(a), the Department will review the supplied information. All such emissions data shall

be available to the public during normal working hours at the office of the Division of Air Quality Control and at such other offices as the Department may specify. Copies of all information supplied to the Department pursuant to 310 CMR 7.12 shall be retained by the facility owner or operator for three years after the date the report is submitted.

((2) Reserved)

- (3) Fuel Utilization Facilities: Any person having control of a fuel burning facility, such as but not limited to a coal, oil, wood, or gas burner, with a rated input capacity in excess of that described in Table 7.12(3) shall comply with 310 CMR 7.12(1).

TABLE 7.12(3)

<u>FUEL TYPE</u>	<u>MAXIMUM ENERGY INPUT CAPACITY GREATER THAN (Btu/hr)</u>
distillate oil	10,000,000
natural gas	10,000,000
residual oil	10,000,000
solid fuel	3,000,000
used oil fuel	3,000,000
landfill gas	3,000,000

and any other facility(ies) as the Department may require.

- (4) Facilities: Any facility with federal potential emissions greater than the following levels shall comply with 310 CMR 7.12(1), such potential emissions shall not include potential emissions from motor vehicles, incinerators or products of combustion from fuel utilization facilities.

- (a) two tons/yr. of particulate matter;
- (b) 2.5 tons/yr. of oxides of sulfur;
- (c) ten tons/yr. of organic material; or
- (d) 4.4 tons/yr. of nitrogen dioxide.

- (5) Incinerators: Any person having control of any hazardous waste incinerator or an incineration facility with a capability of reducing in excess of 50 pounds per hour of waste shall comply with 310 CMR 7.12(1).
- (6) Any facility which emits an air contaminant subject to a National Emission Standard for Hazardous Air Pollutants under the federal Clean Air Act, as amended, and for which the Department has received delegation from the U.S. Environmental Protection Agency, shall comply with 310 CMR 7.12(1).
- (7) The Department may, for the purpose of conducting a continuing inventory of air pollution source emissions, require any person owning, operating or controlling an air contamination facility not included in 310 CMR 7.12(3) through (6), to register such source in accordance with 310 CMR 7.12(1).
